DEPARTMENT OF THE AIR FORCE  
HEADQUARTERS UNITED STATES AIR FORCE  
WASHINGTON, D.C.

REPLY TO  
ATTN OF: INYSI

5 OCT 1982

SUBJECT: Advanced Imagery Interpretation Orientation Course (U)

TO: Executive Secretary, COMIREX

1. (U) During recent sessions of the COMIREX Advanced Imagery Interpretation Orientation Course (AIIOC), problems have been encountered in passing student security clearances. Individuals have repeatedly shown up at the school not properly certified. Not only does this cause classroom time to be missed, but it is also an unnecessary burden on the administrative staff there who must attempt to verify security accesses.
2. (U) To correct this problem, we have made a change in the nomination procedure. Clearances must now be certified PRIOR to final course selection. This places an added responsibility upon you to request access certification when soliciting nominations and to get this information to us when submitting your final approved list. Without this data, we simply cannot select any individuals to attend the course.  
USAF                      USAF
3. (C) Another change has also been made in the AIIOC in that the curriculum has been expanded to include information at the  and  levels. If any of your nominees currently hold these accesses, we request that you include this information when certifying their clearances to us. All other individuals will be briefed on a one-time basis when they reach the school.  
25X1                      25X1
4. (U) Any questions on these new procedures may be directed to Maj Jon Lindstrom or Capt Don Erickson, telephone 695-3318.
